NOW AVAILABLE AT HAIR SUPPLIES...

Makeup is a part of everyday for almost every woman. With new brands appearing ever so frequently, often you are left with questions on what's bad and what's unhealthy for your skin. It is almost impossible to keep up with the science of makeup.

With Bodyography Professional Cosmetics, you don't have to be a dermatologist to know what's good for your skin. You just have to be you. Since it's founding in the early 90s and a simple philosophy based on skin care and anti-ageing, Bodyography Cosmetics are manufactured exclusively in the United States using formulas that are unique in the industry. By working closely with their labs and a select group of top makeup artists, they're able to develop innovative cosmetic products that also represent exceptional value and give you that sheer look you desire.

Available in leading salons only throughout North America and now Australia, Bodyography products undergo extensive testing by clinical dermatologists to ensure they meet quality standards that are among the highest in the industry.

It's beauty with a conscience for both you and the environment; with the use of minimal packaging that is recyclable, and strictly animal free testing, they look fabulous the way they are.
